I'll talk to Maggie, but with no certainty, probably need to get started ASAP on drafting SOW. I should be able to take existing DES SOW and reduce to cover Oct 1 to Dec 31. Not great timing for me, but needs to be done. Hopefully, contract negotiations are relatively quick.

Just to tied us over till the RAF TO can be awarded and start to perform the work, is the plan.

Thanks Fran.

I have asked our RPM, Dean Tagliaferro to draft a list of tasks/activities that need to be performed, will share upon receipt.

This project is a very high regional priority, it is one of Dennis's key priorities and accomplishments. Dennis is directly involved, as is Bryan in the work being performed at the site. So I think we need to have the dialogue with OGC, about getting contractor support after 9/30 when the USACE contract expires. EPA does not have the staff to support the project with just our resources.

Meghan, I haven't had a chance to discuss this yet with Maureen; I just spoke with Ian; I/we do have some concerns that would need to be addressed before I would suggest proceeding.

- 1.
- 2.
- 3.

Ex. 5 Deliberative Process (DP)

Let me know if you have any additional questions.

Thanks.

Fran

Given the facts below, we think it is unlikely that we will be able to make a RAF TO award before the end of September. Since the current GE contract expires at the end of September, we are considering whether we should develop a START TO for short term – couple of months support. Based on expertise and location, it needs to be done under the ID/IQ versus fixed price team. Do you have any concerns with this approach? We would continue the RAF procurement as all outstanding issues are resolved.

RAF Status

- **Ex. 5 Deliberative Process (DP)**
- Timing for resolution of the GAO protest is unknown.

Happy to set up a call to discuss if needed.

Thanks.
